

Bhuwan Thapa

Motivated and detail-oriented Full Stack Java Developer with a strong foundation in Java, Spring Boot, Hibernate/JPA, and RESTful API development. I have hands-on experience in building scalable backend applications, integrating databases like MySQL, and developing user-friendly interfaces using HTML, CSS, JavaScript, and modern frameworks. I am passionate about writing clean, maintainable code, learning new technologies, and building efficient end-to-end applications that solve real-world problems.

WORK EXPERIENCE

The SkyBrisk

Full Stack Java developer Intern

Jan 2026 - Present

Currently working as a Java Developer Intern, contributing to the development of backend applications using Java and Spring Boot. Actively involved in designing and implementing RESTful APIs for a Book Management System, including CRUD operations, authentication, and database integration. Collaborating with the development team to debug issues, optimize performance, and follow clean coding practices. Gaining hands-on experience with MySQL, API testing using Postman, and version control using Git/GitHub while following agile development workflows.

1 stop

Web Development Backend Intern

14/01/2025 - 25/04/2025

Designed and implemented backend features using **Spring Boot (Controllers, Services, Repositories)** and followed clean architecture principles.

Created and tested **RESTful APIs** for user authentication, data processing, and CRUD operations.

Integrated **MySQL** databases, performed data modeling, and enhanced data retrieval performance with optimized queries.

Worked closely with frontend teams (React) to ensure accurate API responses and seamless UI interaction.

Assisted in debugging production bugs, improving API response time, and writing technical documentation.

EDUCATION

Chandigarh Group of Colleges (CGC), Landran

Bachelor of Technology (Computer Science) - 8.20 CGPA

14/08/2021 - 24/06/2025

A premier institution known for its strong technical curriculum, industry-oriented programs, and excellent placement record. Offers hands-on exposure through projects, workshops, and real-world training.

New Yashoda Public School (NYPS)

12th - 88.6 %

12/02/2020 - 25/04/2021

A disciplined and academically focused institution offering quality education with emphasis on foundational learning, holistic development, and strong values.

10th - 91.2 %

14/02/2018 - 28/04/2019

A disciplined and academically focused institution offering quality education with emphasis on foundational learning, holistic development, and strong values.

PROJECTS

Invoice Processing System

24/01/2024 - 20/03/2024

Developed a complete Invoice Processing System with backend built on Spring Boot, implementing layered architecture (Controller, Service, Repository). Integrated MySQL for persistent storage and implemented CRUD operations for invoices and items. Added Spring Security for login/signup and role-based access. Implemented PDF generation using iText, soft delete functionality, invoice editing, and summary analytics. Frontend created using Thymeleaf + Bootstrap, enabling users to manage invoices through a responsive interface.

Doubt Solver System

25/05/2025 - 02/07/2025

Developed a Full Stack Java Doubt Solver System featuring Spring Boot REST APIs for doubt posting, listing, replying, and managing user roles. Integrated MySQL database for storing doubts, responses, and user credentials. Implemented Spring Security for login/signup and role-based access. Built the frontend using React/Thymeleaf + Bootstrap for a responsive interface that enables students and mentors to interact seamlessly.

Developed a BookStore Management System using Java and Spring Boot with CRUD operations, search, pagination, role-based access control, and MySQL database integration.

SKILLS

- Java (Core Java, OOPs, Collections, Exception Handling)
- SQL
- JavaScript
- Spring Boot
- Spring MVC
- Spring Security (Authentication & Authorization)
- Hibernate / JPA
- RESTful API Development
- HTML5
- CSS3
- JavaScript (ES6+)
- Bootstrap
- Thymeleaf / JSP
- MySQL
- PostgreSQL (Basic)
- Git & GitHub
- Maven
- Postman
- IntelliJ IDEA / Eclipse / VS Code
- MVC Architecture
- Microservices Basics
- CRUD Operations
- Pagination & Searching
- Role-Based Access Control (RBAC)
- API Integration
- Unit Testing (JUnit – Basic)
- Debugging & Exception Handling
- Docker (Basics)
- AWS / Cloud Deployment (Basic)
- Problem-Solving
- Debugging & Analytical Thinking
- Team Collaboration
- Time Management
- Continuous Learning

CERTIFICATE

Web Development Backend Intern

Completed a hands-on internship focused on building and maintaining backend applications using **Java, Spring Boot, REST APIs, MySQL, and Git**. Worked on real-world modules involving API development, database integration, debugging, and performance optimization. Collaborated with the development team to deliver production-ready backend features and documentation.

Full Stack Java Developer Certificate

Completed an in-depth training in Core & Advanced Java, covering OOP concepts, multithreading, exception handling, JDBC, collections framework, and real-world Java application development. Strengthened backend development skills and applied Java principles in practical projects.

Beginner to Beyond C++ Certificate

Successfully completed a comprehensive course focused on Object-Oriented Programming, data structures, memory management, STL, and problem-solving fundamentals. Gained hands-on experience in writing efficient C++ code and implementing algorithms using industry-standard practices.
